

NOW AVAILABLE just off the press

A 28 page compilation of re-print and new articles on the preparation and use of slides in selling and training, prepared by popular demand, and now available in compact easy to read form.

YOU ASKED FOR IT!!!

Demands for enlightening data and specifics from many people in the Audio-Visual field caused us to compile this booklet **AUDIO-VISUAL SLIDE PROJECTION GUIDE**, the making, projection and application of slides in selling, training, advertising and entertaining.

Much time and care went into compiling this useful and otherwise unattainable material usable by persons charged with the responsibility of producing and applying visual aids. Special care was given to data useful to **TRAINING DIRECTORS** and **ADVERTISING DIRECTORS**, because their work can be made so much easier and eminently more resultful with the aid of the articles in this booklet. Subjects include:

- How to choose a screen
- Facts about rear projection
- Ideas for business and industry

This booklet is what any A-V student or practitioner has been waiting for — this is what **YOU** need and want. The price is only \$1.00 (our cost) including postage to you.

- A-V in industry today — a census
- How to get the most out of slides
- Accurate projection table

It is our intention to re-issue the book after careful revision from time to time. We invite comments and suggestions to make it constantly more useful to all interested in using slides as a potent and effective tool.

SPECIAL ATTENTION TO SELECTROSLIDE A-V DEALERS . . .

Why don't you order a quantity of these booklets for distribution to all of your customers and prospects?

(Tear off order blank and return with your check)
